

The Heritage Alliance presents

HISTORY DETECTIVES

History detective kits provide hands-on learning to classrooms, school groups, and other youth across the region. Students become history detectives, investigating the origin, use, and significance of objects from the past! This program allows students to interact with artifacts, complete guided worksheets, and participate in thought-provoking discussion and analysis. These kits allow The Heritage Alliance to share artifacts from our collections with local youth in order to promote an understanding of and appreciation for history.

KIT CONTENTS

- Gloves
- Protective eyewear
- Magnifying glass
- Measuring tape
- Flashlight
- Clipboard
- Pencils
- Mat for object

Students can...

ENGAGE

History comes to life for students as they handle and interpret artifacts that were made and used by people of the past.

LEARN

This program offers focused, hands-on learning that promotes critical thinking and shared inquiry. Interaction with primary sources and artifacts also supports classroom curriculums by helping students visualize concepts they have read or heard about.

FORMAT

Our ten history detective kits allow up to 40 participants to complete this one-hour, rotating object lab. Working in small groups, kids team up to answer questions about artifacts from the past.
